Haspalls road Park . Thank you for making the park really nice with new trees and spring bulbs its a nice green space . I understand the council are reviewing the litter bins in the town generally , walking around the park Saturday morning there was a lot of litter , clearly the existing bins in the park seem to small ,I did pick the litter up and try to put it into the bins , but they were overflowing , also there is no recycling facility , for cans & bottles etc. , this is a problem especially on Bank holidays when the park is used a lot , I know the town wishes to be seen as more Green , will the town be investing in more robust bins , there are a lot of people who pick up litter like myself, but we do need to have bigger bins to put the rubbish & recycling in , The area in park where the toilet is located had broken glass and blood which was a bit worrying especially for children , as the park is not officially cleaned till Monday . is there a cleaning service over the weekend / does anyone check the park over the weekend . Thank you to all the staff .
