

Dear Sirs

I am sure you have read many of these documents in your time and heard many times how individuals are going to change the world, this however is different, I am under no illusion that the work I wish to undertake will change the world, I am unlikely to leave a legacy and that's fine.

I have a philosophy that you change the world by changing small things for individuals or small groups, making a small difference sends ripples that can ignite change for others into the future.

Should I be appointed I would pledge to give an ear and a voice to the people I represent, to try and be the change they desire and to make a difference.

I am a local business owner so am very pro-business, if the town succeeds so does business, for a town to succeed it needs controlled growth, I am pro-growth of the town in a sustainable manner.

Being a family man with young children I am pro family and supporting those young families, I believe in families and young people having a voice.

I believe strongly in inclusion, diversity and equality and will represent accordingly at all times.

Kurt Oliver
